Pallet Fork Standard
1 - 3 Tons

The 21-2 type pallet fork has a maximum SWL on respectively 1 ton, the type 22-3MS and 23-3MS have a maximum SWL on respectively 2 & 3 ton.

The 21-2 type is delivered with thin pipe forks where 22-3 and 23-3 are delivered with massive forks that give a lower fork height, larger strength and longevity in correlation to abrasion.

The HEMA 2 & 3 T. standard pallet forks are all delivered with adjustable clearance height and spring locks that are adjustable in width. There are 3 lifting points making the pallet forks applicable for e.g. EUR pallets and brick pallets, to find the correct balance point.

The 22-3M can be used as a brick pallet fork or as a standard pallet fork depending on the fork's mutual placement.

The 23-3MS is at its ground clearance of 2250 mm applicable when handling wood pallets.

The HEMA pallet forks are delivered with hook or standard link.

Forklift Pockets for Pallet Fork
The pallet forks can be mounted with forklift pockets that facilitate the handling of the pallet forks when they are to be moved from and on the truck.

The forklift pockets are easily fitted to both the 2 and 3 ton pallet forks.

The forklift pockets protect against damage on the load shackle and reduces the risk of losing and damaging the pallet forks by truck handling.

Lifting Stops for Pallet Fork
The pallet fork can be mounted with lifting stops for the furthest lifting point.

Easier placement of lifting brackets when handling pallet with the center load point appropriate for lifting point 2 on the pallet fork.

Easily mounted without the need for tools.
### PG 22-3 MS Max 2T

- Load by H = 1120-1720mm  Max 2000 kg
- Load by H = 1870mm  Max 1300 kg

### PG 23-3 MS Max 3T

- Load by H = 1335-2135mm  Max 3000 kg
- Load by H = 2250mm  Max 1700 kg
- Load by H = 2435mm  Max 400 kg
